

Sysco Northern New England

# Sysco Northern New England Buy-Local Initiative

We at Sysco Northern New England appreciate the long and rich history of farming, fishing and producing quality food products here in New England. We believe strongly in the collaborative effort to build more locally based, self-reliant food economies - one in which sustainable food production, processing, distribution, and consumption is integrated to enhance the economic, environmental and social health of our Northern New England communities.

## **Benefits of Buying Local**

We know that locally produced food involves methods that are healthy, do not harm the environment we all share, respect workers, are humane to animals, provide fair wages to farmers, and support our Northern New England farming communities. We support local food producers because it is important to our customers and good for the environment. In fact, WPXT recently aired a spot on our commitment to local products and vendors.

## **We are Listening**

As the food service industry continues to grow, Sysco Northern New England is increasingly able to help drive new and emerging locally produced products to market and help local farmers expand their marketplace. Sysco Northern New England has built networks of local farmers and producers that are now collaborating together to provide an ever expanding offering of local food products. By doing so, our customers can now buy more locally grown and produced products than ever before. The Buy Local team at Sysco Northern New England knows that locally produced products are important to you and your customers. With Sysco Northern New England's Buy Local initiative we've made the connection between the local farm and fork simple. We're making it easier for farmers to do what they do best and customers do what they do best— creating in the kitchen!
